- Год выпуска 1992, станок не эксплуатировался.
- Минимальная длина заготовки 600 мм.
- Может производить одновременно до 6 видов погонажных изделий за один проход.
- Встроенная аспирационно-вытяжная система.
- Гидростанция для привода цепной подачи заготовки.
- Мощность на шпинделях 30 кВт и 27 кВт.
- Скорость подачи до 27 м/мин
- Диаметр шпинделей 60 мм
- Диаметр инструмента 200 мм

Pendu Gang

Pendu Manufacturing Inc. utilizes technology and experience to produce the *finest GANG SAWS* in the industry. The gang saw can be used by itself or as the heart of a complete Pendu wood production system. With that system, two men can produce up to 50,000 board feet of material in one eight-hour shift.

The Pendu saws can handle material from 1/8" to 12" thick and 12" wide, and provide the productivity and flexibility to produce boards, dimension, runners/stringers, squares and specialty items such as log home profiles, fencing and customized products.

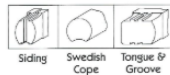

With outboard bearing strength and cantilever arbor convenience, the Pendu gang saws provide dependable performance and quick changeover. Various models and configurations help to meet your specific needs.

The only limit to the Pendu saw system is your own imagination.
